

Caliber Solutions is a tactical partner dedicated to transforming complex **electrical, controls, and instrumentation** challenges into seamless, high-performance solutions. Our comprehensive expertise spans the entire project lifecycle, delivering innovative approaches that drive operational excellence and sustainable success.

With safety as our guide, we specialize in:

- **A Team Committed to Excellence:** Our skilled experts bring a blend of technical proficiency, innovation, and collaboration to ensure outstanding results, with a focus on exceeding expectations on every project.
- **Expert Project Management:** We expertly manage every aspect of your project, ensuring timelines, budgets, and goals are met with precision and efficiency.
- **Electrical, Controls, and Instrumentation Construction:** Our team excels in the construction of electrical systems, controls, and instrumentation, delivering the highest standards of quality, safety, and efficiency.
- **Seamless Commissioning & Startup:** We ensure smooth commissioning and startup processes, setting up your systems for optimal performance and reliability.
- **Ongoing Maintenance & Optimization:** We provide continuous support, maintaining and optimizing systems to maximize efficiency, uptime, and overall performance.

OUR PROMISE

We don't just execute projects—we focus on possibilities. Through the combination of cutting-edge technology, deep industry knowledge, and a relentless commitment to the success of all stakeholders, Caliber Solutions is dedicated to predictable, reliable service transforming challenges into opportunities. Partner with us, and experience the difference of true strategic collaboration.

01 Rigorous Safety Standards

We maintain the highest safety protocols across all processes to protect people, equipment, and the environment.

02 Industries and Locations Served

Our versatile team has forged lasting relationships across power plants, chemical plants, refineries, warehouses, offshore facilities, wind and solar farms, EV infrastructure, sawmills, mining operations, grain storage, and more.

We specialize in navigating the complexities of hazardous environments and diverse geographical locations.

03 Our Collaborative Approach

As a dedicated partner, we combine project management precision with practical field experience in automation and control. Our expertise spans from traditional pneumatic systems to state-of-the-art digital instrumentation, ensuring we deliver optimized solutions for any industrial challenge, no matter where it's located. We're not just there for a project; we're there for the long haul.

Project Management

- Feasibility Study
- Scheduling: P6 & MS Projects
- Project Controls
 - Productivity
 - Handover/Turnover Coordination
 - SPI/KPI Tracking

Instrumentation + Controls

- Pneumatic Instrumentation & Controllers
- Digital Instrumentation & Smart Devices
- Protocols:
 - HART, 4-20mA
 - Profibus/Modbus
 - Foundation Fieldbus
 - Honeywell DE
- PLC Programming and Installation
- Loop Checks
- Tubing systems
- Fiber installation, testing & terminations

Electrical

- Classified Area Installations
 - Ex, ATEX, NEC
- 34.5 – 5kv
- 480v-24v
- Conduit systems:
 - Plasti-Bond, Aluminum & Rigid
- Cable tray systems
- Equipment Installation/Testing/Energization:
 - Switchgear
 - Distributions
 - MCC
 - Panelboards
 - Transformers
 - Communications and Monitoring Systems
- Lighting Installations/Upgrades
- Heat Trace/Freeze Protection Systems
- EV Charging Stations
- BESS/Power Walls/Solar

Commissioning + Oversight

- FAT/SAT
- QA/QC
- Completions Apps:
 - Hexagon SMART Completions
 - CXAlloy TQ
 - NetSuite
- Control Loop Verification
- Control Loop Tuning
- Project Consulting & Optimization

Wind

- Third Party
- WTG tech staffing/manpower
- Preventive maintenance
- Commissioning
- Tower rescue

Solar

- Third Party
- Preventive Maintenance
- Commissioning
- Eng & Design
- Solar tech staffing/manpower
